Portfolio: <https://vignesh-5gv.pages.dev/>

PROFESSIONAL SUMMARY

Final-year CS undergrad with hands-on experience shipping Java backend systems using Spring Boot, REST APIs and wiring production-ready AI into real applications. Adept at translating complex business problems into scalable technology solutions - from RESTful microservices to real-time data pipelines. Eager to bring hands-on full-stack development skills, strong analytical thinking, and a collaborative mindset.

EDUCATION

B.Tech Computer Science and Engineering

2023 – 2027

Woxsen University, Hyderabad | CGPA: 8.7 / 10

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, SQL.
- **Frameworks:** Spring Framework, Spring Boot, Spring AI, React.
- **Core Java:** OOP, Collections, Exception Handling, Multithreading, Microservices
- **CS Fundamentals:** DSA: LeetCode: 200+ problems solved, DBMS, OS, System Design
- **Tools:** Git, Postman, Maven, Swagger, kafka, Hibernate ORM
- **Databases:** MySQL, PostgreSQL, Redis, MongoDB
- **Cloud & DevOps:** AWS EC2, Docker, Linux fundamentals, CI/CD pipelines
- **Soft skills :** Problem Solving, Teamwork, and Communication

KEY PROJECTS

QUASAR — Student Collaboration Platform

LINK : <https://quasar-8bv.pages.dev/>

React · Spring Boot · OAuth2 · JWT · PostgreSQL · Docker · Spring AI

June 2025

- Student collaboration platform for college students to discover projects, form teams, and contribute skills — solving the gap where capable students have no structured way to find meaningful peer projects beyond classroom assignments.
- Built Spring Boot backend with 35+ Swagger-documented REST APIs, Secured platform with GitHub OAuth2, JWT, and role-based access control, implemented layered security controls across API and data layers
- Semantic project recommendation engine via Spring AI + pgVector embeddings for context-aware skill-to-project matching, deployed on AWS EC2 with Docker, validated with JUnit5 unit and integration tests.

SEWA — Sepsis Early Warning Agent

2025 – 2026

React · Spring Boot · PostgreSQL · HAPI FHIR · Kafka · WebSocket · Docker.

- End-to-end ICU clinical decision support system for physicians — detects early sepsis from live patient vitals before it turns life-threatening, targeting the ~7% per-hour mortality increase caused by delayed diagnosis.
- Built Spring Boot + HAPI FHIR R4 backend streaming live ICU vitals via Kafka to an ML microservice (AUROC ~0.87, trained on 1M+ records) and via WebSocket to a React physician dashboard for real-time risk monitoring.
- Automated physician alert pipeline on sepsis detection containerized with Docker, ensuring zero data loss across the event-driven architecture.

MergeRank — Competitive Programming Analytics Platform

LINK: <https://mergerank.pages.dev/>

React · Node.js · Express · MongoDB · Google Gemini API

February 2026

- Built end-to-end analytics dashboard aggregating data from 5 external APIs (LeetCode, GitHub, Codeforces, CodeChef, HackerRank) into a unified MongoDB backend with scheduled batch processing
- Designed leaderboard scoring engine with inactivity alerts and CSV export endpoints; exposed via REST APIs consumed by the React frontend

CERTIFICATIONS

- Java Full Stack & Spring Boot AI — Telusko
- JUnit Testing — Udemy
